We have the solution for you! The new amazing patented BIRD-ZERK FEEDER. It will change your life forever! No more sweeping food off the floor and throwing dollar\$ into the trash. The BIRD-ZERK FEEDER is great for pet birds or breeding birds. It will increase your profit\$ with your breeding birds because of the seed or pellet you will \$ave with a BIRD-ZERK FEEDER. The BIRD-ZERK FEEDER will pay for itself in no time, because the wasted food is saved and recycled. The feeder will cut your food bill by at least 50%, and keep 80% to 90% of the mess and wasted food off the floor or bottom of the cage. So after a short time, the BIRD-ZERK FEEDER will pay for itself in the savings of the food, then the feeder is free. And it will continue to save you money year after year. Even with our revolutionary design in the BIRD-ZERK FEEDER, some of our parrot friends are smart enough to get a few of their seeds or pellet out of the feeder while eating, so we cannot guarantee 100% of the mess will stop, but just think of the money you will \$ave!

This Avian Veterinarian approved feeder is constructed of high strength clear acrylic and is designed to withstand bird abuse. The BIRD-ZERK FEEDER is low maintenance and easily cleaned. It instantly shows you how much food your bird has consumed and it will fit any cage because it comes apart into two pieces. Best of all there is no need to cut your cage bars or wire, unlike some feeders on the market, where you have to cut a very large hole for the feeder to fit. The BIRD-ZERK FEEDER comes apart into two pieces. Half of the feeder, the part the bird eats out of attaches to the inside of the cage, the recapturing part of the feeder attaches on the outside of the cage. The two halves bolt back together through the cage wire or bars and you do not have to damage your expensive cages. When you bolt the two halves of the feeder together, it becomes part of your cage, and the birds cannot unhook it, letting the feeder fall to the floor and break. The BIRD-ZERK FEEDER has an attached top lid and bottom sliding door at no extra charge. The door and lid are built into the feeder when we assemble it.

Also the BIRD-ZERK FEEDER does not fit where your food bowls are located. The BIRD-ZERK FEEDER goes on the sides, back or front door of your cage, so that the bowls normally used for food can now be used for water, or fresh fruits, and veggies.

We have seven sizes to fit all exotic birds, which includes a colony feeder for those breeders that raise dozens of birds together. **THE SIZE OF BIRD-ZERK FEEDER THAT YOU ARE BUYING MUST BE FOR THE RIGHT SIZE BIRD OR BIRDS.** For instance, you would not buy a large feeder for colonies of finches. The large feeder is made for COCKATOOS, AMAZONS AND SMALL MACAWS, NOT FINCHES CANARIES, OR ANY OTHER SMALL BIRDS. Please refer to our [Feeder Guide](#) for the size you need for your bird or birds.

Each BIRD-ZERK FEEDER is professionally custom made and has been tested on several large aviaries since 1993. The BIRD-ZERK FEEDER has been used successfully on over 100,000 birds from the smallest finches to the largest of birds, the Hyacinth Macaw.

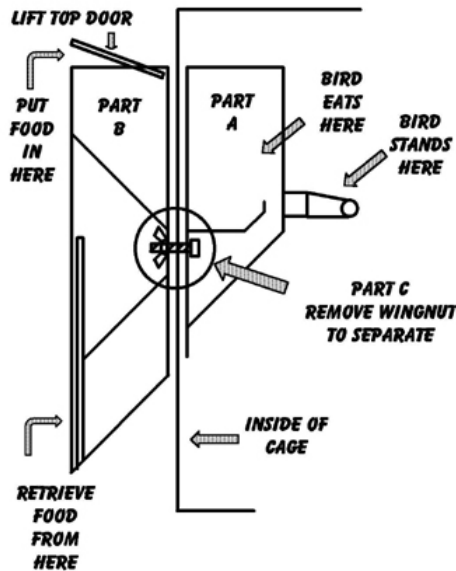

This food saving device has been awarded

Instructions for the

# BIRD-ZERK FEEDER

## A RECYCLING BIRD FEEDER

The feeder is designed to fit on almost any cage, from the professional breeder using welded cage wire to the pet bird in a Wrought Iron decorative cage. The feeder is made of two main parts, (PART A) the half that goes on the inside of the cage where the bird eats and (PART B) the half that goes on the outside of the cage which holds the food.

To install on any cage simply follow these steps:

**STEP 1)** Remove 2 wingnuts (PART C) holding feeder together and separate.

**STEP 2)** Take part A (Inside) of feeder, put inside of cage with bolts protruding thru the bars of the cage to the outside.

**STEP 3)** Take part B (Outside) of feeder, align 1/4" holes with the 1/4" bolts on part A (Inside) of feeder and reassemble the two halves of the feeder back together.

**STEP 4)** Resecure wingnuts to 1/4" bolts that were previously removed. Tighten down snugly, "DO NOT OVER TIGHTEN" see notice below.

**STEP 5)** Lift top door and pour in any dry food that you feed your bird such as seed, pellet or nuts.

**STEP 6)** To remove hulls and uneaten food from lower bin, simply put a small container under the bottom door, lift bottom door and retrieve. The food that normally was all over the floor is now reusable, just blow off hulls with a fan or hair blow dryer, or sift out pellet powder with a flour sifter and put uneaten food back in the upper bin and top food level off with seed, pellet or nuts.

**NOTICE:** *Even though the Bird-Zerk Feeder can withstand a lot of wear and tear, if bolts are over tightened or parts are dropped, the acrylic can chip, crack or break. We suggest that you do not over tighten the bolts and obtain assistance when installing the feeder onto bird cage or aviary.*

**ADAPTER:** *If you have a wrought iron cage that uses a square tube as the horizontal stabilizing bar, then you will need an adapter for this cage. The adapter will enable the feeder to work correctly when there is a large space between the two halves of the feeder.*

**VACATION:** *The feeder is not meant to be used as a vacation feeder with no one looking in on your birds every day. The feeder requires daily filling, depending on your birds. Also, some birds (especially African Greys) need some time to get used to the feeder.*

**MAINTENANCE AND CARE:** *To wash and clean the Bird-Zerk Feeder use warm water with a mild soap and clean with a soft cloth or sponge. Never use anything abrasive such as scouring pads nor harsh cleaners or detergents.*

## Price & Description

All feeders are designed to work with either pellet or seed.  
The larger feeders are designed to work with nuts also.

### SMALL FEEDER

The small is designed for one or two small birds, as well as a breeding pair, such as Finches, Parakeets, Canaries, etc. Made of 1/8" thick acrylic.

The small price is \$29.95 plus s/h.

Measurements		
	INSIDE	OUTSIDE
WIDTH	2 3/8"	2 3/8"
HEIGHT	7 1/4"	9 1/2"
DEPTH	2 1/2" *	2"
FOOD	n/a	4 oz. **

\* with perch: 4 1/8"

\*\*weight is based on "Small Hook Bill" mixture

### PET FEEDER

Measurements		
	INSIDE	OUTSIDE
WIDTH	2 7/8"	2 7/8"
HEIGHT	9 1/8"	12 3/8"
DEPTH	3 1/8" *	2 1/2"
FOOD	n/a	10 oz. **

\* with perch: 5 1/8"

\*\* weight is based on "Small Hook Bill" mixture

The pet is designed for small birds up to one Cockatiel, including Finches and Parakeets, as well as a breeding pair of smaller birds, such as Lovebirds, Parrotlets, Green Cheek Conures, etc. Made of 1/8" thick acrylic.

The pet price is \$39.95 plus s/h.

## MEDIUM FEEDER

The medium is designed for mid to small sized birds up to one Indian Ringneck, including small colonies of Finches and Parakeets, as well as a breeding pair of smaller birds, such as Senegals, Quakers, Plumheads, etc. Made of 1/8" thick acrylic.

The medium price is \$49.95 plus s/h.

Measurements		
	INSIDE	OUTSIDE
WIDTH	3 3/8"	3 3/8"
HEIGHT	11"	15 3/4"
DEPTH	3 5/8" *	3"
FOOD	n/a	1 lb. 4 oz. **

\* with perch: 5 5/8"

\*\* weight is based on "Small Hook Bill" mixture

## INTERMEDIATE FEEDER

Measurements		
	INSIDE	OUTSIDE
WIDTH	3 7/8"	3 7/8"
HEIGHT	13 1/4"	17 3/4"
DEPTH	4 1/4" *	3 1/2"
FOOD	n/a	2 lb. 4 oz. **

The intermediate is designed for mid sized birds up to one African Grey, including Rosellas, as well as a breeding pair of birds, such as Indian Ringnecks, Princess of Wales, most conures, etc. Made of 1/8" thick acrylic.

The intermediate price is \$79.95 plus s/h.

\* with perch: 7 3/4"

\*\* weight is based on "Small Hook Bill" mixture

## LARGE FEEDER

Measurements		
	INSIDE	OUTSIDE
WIDTH	4 3/8"	4 3/8"
HEIGHT	15 1/2"	20 3/4"
DEPTH	4 7/8" *	4"
FOOD	n/a	3 lb. 4 oz. **

\* with perch: 8 7/8"

\*\* weight is based on "Small Hook Bill" mixture

The large is designed for large sized pet and breeding birds such as Amazons, Cockatoos (not including Mollucan) and mini-macaws, etc. **Made of 3/16" thick acrylic.**

The large price is \$99.95 plus s/h.

## COLONY FEEDER

Measurements		
	<b>INSIDE</b>	<b>OUTSIDE</b>
<b>WIDTH</b>	5 3/8"	5 3/8"
<b>HEIGHT</b>	12"	20 3/4"
<b>DEPTH</b>	3 5/8" *	4"
<b>FOOD</b>	n/a	3 lb. 8 oz. **

The colony is designed for small colonies of birds up to the size of Cockatiels, including Finches, Parakeets and Lovebirds, as well as other small birds. Made of 1/8" thick acrylic.

The colony price is \$89.95 plus s/h.

\* with perch: 5 5/8"

\*\* weight is based on "Small Hook Bill" mixture

## EX-LARGE FEEDER

Measurements		
	<b>INSIDE</b>	<b>OUTSIDE</b>
<b>WIDTH</b>	5 3/8"	5 3/8"
<b>HEIGHT</b>	21"	27 3/8"
<b>DEPTH</b>	5 3/4" *	5"
<b>FOOD</b>	n/a	7 lb. 6 oz. **

The Ex-Large is designed for the largest sized birds up to the Hyacinth Macaw, including Mollucan Cockatoo, Blue & Gold, Scarlet, and Green Wing, etc. The feeder works with a single bird, as well as breeders. **Made of 1/4" thick acrylic.**

The Ex-Large price is \$194.95 plus s/h.

\* with perch: 11 3/8"

\*\* weight is based on "Small Hook Bill" mixture

**Note: For the feeder to work properly, it must be the appropriate size for the bird you have. If the feeder is too small for the bird then not only will it not work properly, but a bird might be able to damage the feeder. If you buy a feeder too large for your bird or birds, then the birds might get trapped inside the feeder. For example, a Large Macaw or Cockatoo can damage an intermediate size feeder. Also finches would not work on a Large feeder and can become trapped inside the feeder**
